

Laptop Policy

Field	Details
Document ID	BT-IT-002
Version	1.3
Effective Date	1 April 2025
Policy Owner	Head of IT
Department	Information Technology
Approved By	Chief Operating Officer
Next Review	31 March 2027

1. Purpose

This policy explains how company laptops are issued, used, protected and returned, so that employees have reliable equipment and company data stays secure.

2. Scope

This policy applies to all employees and contractors who are issued a Beacon laptop and its accessories (charger, mouse and bag).

3. Main Rules

3.1 Issue and Refresh

- Every permanent employee is issued one company laptop on the date of joining, with a standard configuration for their role.
- Laptops are replaced every 4 years, or earlier if the device cannot be repaired.
- Each laptop carries an asset tag and is recorded in the IT asset register against the employee's name.
- Requests for higher-specification laptops must be approved by the Department Head.

3.2 Security Settings

All company laptops are configured by IT with:

- Full disk encryption
- Endpoint protection and device management software
- Automatic screen lock after 5 minutes (see BT-IT-001)
- Automatic updates. Employees must restart their laptop within 3 days of an update prompt.

Employees must not disable or change these settings.

3.3 Acceptable Use

- The laptop is for Beacon work. Limited personal use is allowed if it is lawful, does not affect work and does not involve installing unapproved software (see BT-IT-004).
- Family members and friends must not use the laptop.
- USB storage devices are blocked by default. Exceptions can be requested from the IT Service Desk with manager approval.
- Company data must not be copied to personal devices, personal email or personal cloud storage.

3.4 Remote Work

- Only the company laptop may be used for remote work (see BT-HR-003). Personal devices must not be used to access internal systems. Email and chat on a personal phone are allowed only with the company mobile management app and MFA.
- The company VPN must be connected when accessing internal systems from outside the office (see BT-IT-003).

3.5 Travel and Safekeeping

- Keep the laptop with you at all times during travel. It must be carried as hand luggage, never in checked baggage.
- Do not leave the laptop in a car, or visible in a hotel room or public place.
- When travelling on business, hotel and public Wi-Fi may be used only with the VPN connected.

3.6 Loss, Theft and Damage

1. Lost or stolen laptops must be reported to the IT Service Desk immediately, and no later than 2 hours after discovery. IT will remotely lock and wipe the device. The employee must also file a police complaint (FIR) for theft.
2. In the first case of theft or loss with an FIR copy, no cost is recovered from the employee.
3. In cases of loss or damage due to negligence, the employee may be asked to pay the depreciated value of the laptop. Depreciation is 25% of purchase cost per year over 4 years.
4. Accidental damage must be reported to IT within 1 working day.

3.7 Repairs and Support

- Raise a request with the IT Service Desk (extension 4000). IT will respond within 1 working day.
- If a laptop cannot be repaired quickly, a replacement is provided within 2 working days.

3.8 Return on Exit

Laptops and accessories must be returned to IT on or before the last working day (see BT-HR-005). Missing or damaged items are recovered from the final settlement.

4. Exceptions

- Employees on long-term deputation or client sites may use the client's equipment if approved in writing by the Head of IT.
- Developers who need local administrative rights may request them under BT-IT-004.

Internal Use Only
